

# Portfolio Information's

There are following things which I want to replace and insert it into pages

👋 Hey, I am [Your Name]

## I build scalable software and deliver seamless tech solutions

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

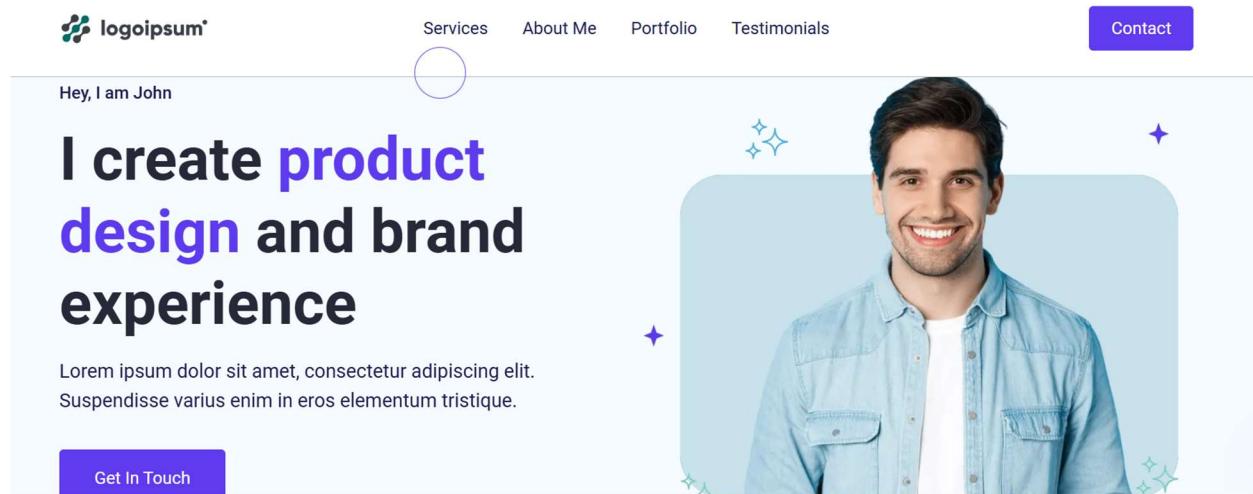

I specialize in developing efficient, maintainable code and building impactful digital experiences.

- ◆ Web Development · Mobile Apps · Cloud Integration · System Architecture
- 

And for the buttons and labels:

- Change “**Get In Touch**” to: Let’s Build Something
- Replace “**product design and brand experience**” with: software solutions and digital platforms
- Replace the image of the designer with a professional image of yourself as a developer (if you’d like help editing that image, feel free to send one!).

That stuff changed in the following page

The image shows a placeholder for a website template. At the top left is the "logopsum" logo. The top navigation bar includes "Services", "About Me", "Portfolio", "Testimonials", and a "Contact" button. Below the navigation is a circular placeholder for a profile picture with the text "Hey, I am John". The main content area features a large heading "I create product design and brand experience" in bold black and purple text. Below the heading is a short paragraph of placeholder text: "Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse varius enim in eros elementum tristique." A "Get In Touch" button is located at the bottom left of the content area.

## My Skills

### Expertise Section

Replace that following stuffs

#### My Skills

## My Expertise

#### Software Development

Design and build robust, scalable, and efficient applications using modern Java and .NET technologies.

#### Software Testing

Ensure high code quality through unit testing, integration testing, and debugging best practices.

#### Problem Solving

Analyze complex problems and implement optimal technical solutions using clean and efficient logic.

#### Maintenance & Debugging

Identify and fix issues, optimize existing systems, and ensure applications run smoothly over time.

The Page is Given Below where I want Changes but don't change the Layout Style
